

**Amendments to the Claims:**

This Listing of Claims replaces all prior versions, and listings, of claims in this application.

**Listing of Claims:**

Claims 1-42<sup>8</sup> (Previously Cancelled).

429. (Currently Amended) A ~~sheet of~~ printable business cards, card sheet, comprising:

a facestock sheet construction having a front side and a back side;

a continuous liner sheet releasably secured to and covering the back side;

the facestock sheet construction including a cardstock sheet, an adhesive layer on a backside of the cardstock sheet, and a film layer on the adhesive layer;

facestock continuous through-cut lines through the facestock sheet construction to the back side but not through-cut through the liner sheet;

the through-cut lines defining at least in part perimeter edges of printable business cards and a matrix waste portion;

portions of the back side of the facestock sheet construction forming back side surfaces of the printable business cards;

areas of the liner sheet covering back sides of all of the through-cut lines and thereby holding constructed and adapted to hold the printable business cards and the matrix waste portion together when the ~~sheet of~~ printable business cards card sheet is fed through a printer or copier for a printing operation on the printable business cards; and

the liner sheet and the through-cut lines being constructed and adapted to allow ~~allowing~~ the business cards to be removed from the liner sheet and from the matrix waste portion and separated after the printing operation into individual printed business cards.

Claims 430-431 (Presently Cancelled).

432. (Previously Presented) The sheet of claim 429 wherein the liner sheet is a solid continuous liner sheet and covers all of the back sides of all of the facestock through-cut lines.

433. (Previously Presented) The sheet of claim 429 wherein the liner sheet is a solid continuous liner sheet which extends the entire width of the facestock sheet construction.

434. (Previously Presented) The sheet of claim 429 wherein adjacent ones of the printable business cards directly abut one another and share common edges.

435. (Previously Presented) The sheet of claim 429 wherein the printable business cards are arranged in a matrix on the facestock sheet construction.

436. (Withdrawn) The sheet of claim 429 wherein the cardstock sheet is a glossy cardstock sheet.

437. (Previously Presented) The sheet of claim 429 wherein (a) the facestock sheet construction includes left and right side edges, (b) the through-cut lines include frame cut lines and grid cut lines, (c) the frame cut lines include first and second side cut lines spaced in from the left and right side edges respectively, and disposed parallel thereto, and first and second end cut lines spaced in from and parallel to the first and second end edges, both of the end cut lines engaging both of the side cut lines, the frame cut lines defining a central area on the facestock sheet construction, (d) the grid cut lines defining a grid disposed in the central area, and (e) the grid cut lines and the frame cut lines separating the central area into the printable media.

Avery No. 2419-US

438. (Previously Presented) The sheet of claim 429 wherein the liner sheet comprises a densified bleached kraft sheet.

439. (Previously Presented) The sheet of claim 429 wherein at least some of the through-cut lines define a waste border portion of the facestock sheet construction around the printable business cards.

440. (Previously Presented) The sheet of claim 429 wherein the through-cut lines include vertical and horizontal cut lines.

441. (Previously Presented) The sheet of claim 440 wherein a top one of the horizontal cut lines extends a full width of the facestock sheet construction.

442. (Previously Presented) The sheet of claim 441 wherein ends of the rest of the horizontal cut lines are spaced inwardly from the left and right side edges of the facestock sheet construction.

443. (Previously Presented) The sheet of claim 442 wherein the rest of the horizontal cut lines extend a distance out beyond the outermost of the vertical cut lines.

444. (Previously Presented) The sheet of claim 429 wherein the liner sheet comprises a base paper sheet.

445. (Previously Presented) The sheet of claim 429 wherein the liner sheet has a thickness of approximately 3.0 mil.

446. (Previously Presented) The sheet of claim 429 wherein the liner sheet has a thickness of approximately 2.0 mil.

447. (Previously Presented) The sheet of claim 429 wherein the solid continuous liner sheet covers the entire back side of the cardstock sheet.

448. (Previously Presented) The sheet of claim 429 wherein the through-cut lines define all of the perimeter edges of all of the printable business cards.

Old Docket No.: 310048-355  
New Docket No.: 11286-01083  
Avery No. 2419-US

449. (Previously Presented) The sheet of claim 448 wherein the printable business cards are arranged in a two column matrix on the facestock sheet construction.

450. (Previously Presented) The sheet of claim 449 wherein the printable business cards in each column of the two column matrix abut adjacent printable business cards in the same column separated only by respective ones of the through-cut lines.

451. (Previously Presented) The sheet of claim 429 wherein the printable business cards comprise a matrix block of printable business cards surrounded by a waste cardstock sheet perimeter.

452. (Previously Presented) The sheet of claim 429 wherein the cardstock sheet is a top-coated cardstock sheet.

453. (Previously Presented) The sheet of claim 429 wherein the adhesive layer is a hot melt adhesive layer, the film is a low density polyethylene film, and the liner sheet is a densified bleached kraft liner sheet.

454. (Previously Presented) The sheet of claim 453 wherein the hot melt adhesive layer is approximately .6 mil thick, the low density polyethylene film is approximately .8 mil thick, the densified bleached kraft liner sheet is approximately 9.0 mil thick and the cardstock sheet is approximately 3.0 mil thick.

455. (Previously Presented) The sheet of claim 453 wherein the hot melt adhesive layer is approximately .6 mil thick.

456. (Previously Presented) The sheet of claim 453 wherein the low density polyethylene film is approximately .8 mil thick.

457. (Previously Presented) The sheet of claim 453 wherein the densified bleached kraft liner sheet is approximately 3.0 mil thick.

Old Docket No.: 310048-355

New Docket No.: 11286-01083

Avery No. 2419-US

458. (Currently Amended) The sheet of claim 453 wherein the ~~cardstock~~ bleached kraft liner sheet is approximately 9.0 mil thick.

459. (Previously Presented) The sheet of claim 429 wherein the printable business cards are arranged in a pair of butt-cut columns and a plurality of butt-cut rows.

460. (Previously Presented) The sheet of claim 429 wherein the facestock sheet construction is approximately 9.0 mil thick.

461. (Previously Presented) The sheet of claim 429 wherein the facestock sheet construction and the liner sheet are both rectangular and have the same width and length dimensions.

Claim 462 (Presently Cancelled).

463. (Currently Amended) The sheet of claim 429 wherein an infeed edge of the ~~sheet of printable business cards~~, card sheet, along an entire width of the sheet is thinner than a body of the sheet.

464. (Currently Amended) The sheet of claim 429 wherein a lead-in edge of the ~~sheet of printable business cards~~ card sheet is calendered to improve feeding of the sheet of printable business cards into the printer or copier.

465. (Previously Presented) The sheet of claim 429 wherein the liner sheet includes a flexibility line extending a width thereof.

466. (Previously Presented) The sheet of claim 465 wherein the flexibility line is a cut line.

467. (Previously Presented) The sheet of claim 465 wherein the flexibility line is proximate an end of the liner sheet.

468. (Previously Presented) The sheet of claim 465 wherein the flexibility line is approximately 1/4 inch from an end of the liner sheet.

**PATENT**

Old Docket No.: 310048-355

New Docket No.: 11286-01083

Avery No. 2419-US

Claims 469-470 (Presently Cancelled).

471. (Previously Presented) The sheet of claim 429 wherein the liner sheet includes a cut line extending a width thereof.

472. (Previously Presented) The sheet of claim 471 wherein the cut line is proximate to but space a distance from an end of the liner sheet.

473. (Previously Presented) The sheet of claim 472 wherein the distance is approximately 1/4 inch.

474. (Currently Amended) The sheet of claim 429 wherein the liner sheet is secured directly to the back side of the facestock sheet construction and a back side of the liner sheet defines a back surface of the ~~sheet of~~ printable business cards card sheet.

475. (Currently Amended) The sheet of claim 474 wherein the top surface of the cardstock sheet is the top surface of the ~~sheet of~~ printable business cards card sheet.

476. (Currently Amended) The sheet of claim 474 wherein the facestock sheet construction includes a top coating on the cardstock sheet and the top coating forms the top surface of the ~~sheet of~~ printable business cards card sheet.

477. (Newly Added) The sheet of claim 429 wherein the film layer is a polyethylene film.

478. (Newly Added) A printable business card sheet, comprising:

a facestock sheet construction having a front side and a back side;

a continuous liner sheet releasably secured to and covering the back side;

the facestock sheet construction including a cardstock sheet, an adhesive layer on a backside of the cardstock sheet, and a film layer on the adhesive layer;

**PATENT**

Old Docket No.: 310048-355

New Docket No.: 11286-01083

Avery No. 2419-US

the liner sheet is extrusion coated on one side with the film layer;

facestock continuous die cut through-cut lines through the facestock sheet construction to the back side but not through-cut through the liner sheet;

the through-cut lines defining at least in part perimeter edges of printable business cards and a matrix waste portion;

portions of the back side of the facestock sheet construction forming back side surfaces of the printable business cards;

areas of the liner sheet covering back sides of all of the through-cut lines and thereby constructed and adapted to hold the printable business cards and the matrix waste portion together when the printable business card sheet is fed through a printer or copier for a printing operation on the printable business cards; and

the liner sheet and the through-cut lines being constructed and adapted to allow the business cards to be removed from the liner sheet and separated after the printing operation into individual printed business cards whose back surfaces are non-tacky.
